

G5 LED UV Inks

The Mutoh G5 LED UV ink is a superior quality rigid UV ink specifically designed to cover a broad range of rigid applications.

The G5 LED UV ink ensures perfect curing with the PJ-2508UF LED lamps yielding superior media adhesion.

G5 inks are suitable for use without primer on a large variety of rigid substrates, including: Polycarbonate, Melamine, Fluted Polypropylene.

The inks will also allow for decorative applications on Glass, Acrylic and Ceramics.

This ink recipe features a superior colour gamut guaranteeing bright, vivid images.

Under Northern European conditions and when used in regular applications with compatible substrates, the printed images will not fade immoderately for up to 24 months.

Product Highlights

- Designed for rigid applications
- Developed specifically for Mutoh's PJ LED UV Lamps
- Superior media adhesion
- High density colour
- New future proof NVC-free ink formulation

CMYK, Clear & White

Piezo Variable Drop

LED UV

Technology

Mutoh G5 inks have been specifically developed for the variable drop greyscale print heads technology integrated in Mutoh's PerformanceJet 2508UF printer. Ideally suited for heat-sensitive media, prints come out dry and ready to finish or deliver.

Application Possibilities

Suited for the production of directional signage, fine art prints, tradeshow graphics, POP prints, retail signage, sign boards, cardboard, small lot packaging prototypes etc.
